Dear reader,

please note that this document represents the submitted deliverable to the European Commission (EC). The review process of the EC is ongoing and once the reviewed document is available, it will be uploaded here.

H2020-JTI-EuroHPC-2019-2

#### HPC INNOVATION FOR EUROPEAN SMES

Innovating and Widening the HPC use and skills base

Project Number: 951745

# D5.1 Dissemination, Communication and Collaboration Plan

This project has received funding from the European High-Performance Computing Joint Undertaking (JU) under grant agreement No 951745. The JU receives support from the European Union's Horizon 2020 research and innovation programme and Germany, Italy, Slovenia, France, Spain.

## **Executive Summary**

This document describes the initial plan for dissemination, communication and collaboration for the FF4EuroHPC project. This plan is a vivid document and thus will be constantly updated on the basis of the project progress. More detailed KPIs (Key Performance Indicators) will be added to measure the performance of certain activities during shorter time frames.

The plan is presented as per defined activities of Work Package 5 (WP5<sup>1</sup>) with Milestones and/or KPIs and due time frame as defined in the project DoA.

Table 4: KPIs for Success stories	17
Table 5: KPIs for collaboration with other entities	18

# **1** Introduction

The overall objective of FF4EuroHPC is to enable the European industry to be more competitive globally by using advanced HPC services (including Simulation, Data Analytics and/or Artificial Intelligence). FF4EuroHPC will achieve this objective by realising the goals of:

- Making advanced HPC services accessible to industrial users, particularly SMEs, through competences available in the project and the experiments.
- Create, publish and distribute success stories to show the full potential of these advanced HPC services.
- Promoting and scaling the business impact through the entire SME ecosystem.

# WP5, will, in collaboration with other WPs, support the achievement of this objective by creating awareness of the business benefits of advanced HPC Services across the whole value chain encompassing end-users, service providers, ISVs, HPC/HPDA/AI experts and providers of HPC-Infrastructure.

Three main tasks are defined in WP5:

- Task 5.1 Outreach, Communication, and Dissemination
- Task 5.2 Success Stories
- Task 5.3 Collaboration with EuroHPC and other entities

Within WP5, five deliverables will be submitted. The first deliverable D5.1 refers to the current document, the second (D5.2) and the third (D5.3) are intermediate and final Dissemination, Communication and Collaboration Reports. The last two deliverables (D5.4 and D5.5) represent two editions of the Success Story Booklet.

Tasks and deliverables will be presented in detail in the following chapters together with the dissemination plan including milestones, performance indicators, and the due time frame.

# 2 Dissemination, communication and collaboration activities plan

The activities in this Work Package have the objective of ensuring **the maximum amount of awareness** via communication and dissemination in collaboration with relevant Digital Innovation Hubs (DIHs) and industry associations with the aim of **maximising the impact** of the project.

In order to achieve and maximize the dissemination objectives of the project, the dissemination activities need to reach the proper target group, covering diverse industries and European geographic regions.

#### There are two main areas of communication and dissemination activities:

- 1. Open call promotion
- 2. Communication of project activities and dissemination of project results

Tasks are divided per activities and described below. The Key Performance Indicators (KPIs) or/and the Milestones and the time frame, within which the objectives of the activity must be achieved, are defined for each activity.

#### 2.1 Open call promotion

Communication activities have the aim to address potential experiment partners within this project – FF4EuroHPC. These activities have an essential influence on the impact of the project by attracting good proposals and selecting quality experiments (quality = high business value, high potential for a greater benefit, high potential for wider impact), experiments with the potential to become a role model for specific industrial applications and experiments that could encourage others to follow their path (overcoming ignorance).

#### Stakeholders and communication partners for open call promotion are:

- Industrial associations, Innovation centres, and other SMEs networks (able to reach a critical mass of SMEs being able to benefit from HPC)
- National HPC Competence Centres (nHPC CCs or NCCs<sup>2</sup>)
- HPC-related Digital Innovation Hubs (DIHs<sup>3</sup>)

The communication in advance of the calls will be done through partners with the following communication channels:

- Webpage
- Social media
- Contribution to posts and forums of partners and other initiatives
- Webinars, workshops, online conferences
- Emailing<sup>4</sup>

<sup>&</sup>lt;sup>2</sup>See: <u>https://www.eurocc-project.eu/</u>.

<sup>&</sup>lt;sup>3</sup> See <u>https://ec.europa.eu/digital-single-market/en/digital-innovation-hubs</u>

<sup>&</sup>lt;sup>4</sup> In accordance to GDPR

#### Public Copyright © 2020 Members of the FF4EuroHPC Consortium

For the open call promotion, the following collaboration between Work Package 2 (WP2: Open Call Management), Work Package 4 (WP4: Exploitation/Business Development Support) and Work Package 5 (WP5: Awareness Creation and Networking) will be needed: WP2 will provide the open call information (goals, ambitions, expected impacts). WP4 will support the promotion activities by consulting national HPC CCs, relevant DIHs and industry associations. The output of the open call promotion is a set of highest quality experiments, involving innovative, agile SMEs and with work plans built around innovation targets arising from the use of advanced HPC services. Experiment proposals should address business challenges from European SMEs from varied application domains.

#### 2.2 Communication of project activities and dissemination of project results

The communication of the project activities (goals, developments, benefits, challenges of the experiments) and their results aim to raise awareness of the benefits of using advanced technologies and motivating potential HPC users to approach such methods. The main content of the communication will revolve around experiments, most notably the success stories. For organisations in related industrial sectors, the success stories provide the summarised information about the technical experiment results, helping them to benefit by investigating similar approaches. More generally, the success stories explain the potential business benefits and innovation impact from using advanced HPC services, which can inform a broader range of stakeholders and motivate a wide range of potential HPC users.

**The communication target** is represented by industrial and commercial HPC user communities, service providers, HPC competence centres, relevant SMEs associations and networks, DIHs and domain specific associations from diverse industrial sectors and different geographic regions:

- General audiences and potential HPC users will be reached through the webpage, social media, newsletters, videos and booklets.
- Specific industrial sectors will be reached through the webpage, tailored flyer (per sector), success stories' videos, articles in sector-specific magazines.
- Specific geographic regions will be covered by national entities such as HPC CC, DIHs and industrial associations.

The plan for the **dissemination** and exploitation of **results** is focused on two channels, supported by WP3, WP4 and WP5:

- **Immediate:** The outcome of each experiment is a solution that has an immediate and direct benefit to the company and in many cases a short term of return on investment.
- **Long-term:** It is expected that many experiments could lead to modelling, simulation and analytics services with applicability beyond the immediate sphere of the application experiment (show case).

WP5 will support communication and dissemination activities by providing the technical infrastructure and developing appropriate material using input from other WPs in particular WP2 (open calls), WP3 (success stories) and WP4 (exploitation and business models).

A draft stakeholder analysis is given in the Appendix. The analysis was built on target audience work undertaken in the previous Fortissimo projects and will be updated in light of the FF4EuroHPC project.

#### 2.3 Task 5.1: Outreach, communication and dissemination

#### GOALS:

- To produce high quality, tailored dissemination content
- To build up a strong presence in community events
- To outreach with HPC CCs, HPC relevant DIHs and industry associations.

# As already mentioned above, there are **two main areas of communication and dissemination** activities:

- 1. The open call promotion
- 2. The communication of the project activities and dissemination of the project results

Dissemination activities will be performed by the participation at other projects' events, at relevant conferences and community meetings, by organizing project workshops and project conferences with invited speakers or presenters, by creating webinars and solid media presence on social media (twitter and LinkedIn) with regular posts on a weekly basis. To provide successful dissemination on project results, newsletters, press releases and some publications in sectorial magazines will be created.

For each of the above-mentioned dissemination activities adequate materials in terms of size and language (technical, business) will be tailored to reach the respective interest groups.

#### **Definition of the targeted interest groups:**

- 1. Technical: service providers, ISVs, HPC/HPDA/AI experts and providers of HPC-Infrastructure.
- 2. Business: end users SMEs, industrial associations and other business stakeholders.

Actions for communication activities are summarised in the following tables (Table 1 and Table 2):

 Table 2: Actions for communication and dissemination of project results.

#### **ACTIVITIES:**

#### 5.1.1 Evolvement of the FF4EuroHPC brand, by finalizing the logo and design

The new logo and visual identity (VI) were developed and approved by the project coordinator. It is obligatory to use the prepared templates and respect the visual identity guidelines.

#### **Milestones:**

The Web page publication, final version of the logo, project brand and design are approved by the project coordinator (USTUTT/HLRS). The project templates for project presentations are approved by the project coordinator. The Design template for project brochures, general presentations and flyers are approved by the project consortium.

**Time frame:** From M1 to M3.

#### 5.1.2 Development of dissemination material

Website, brochure, newsletters, posters, flyers, press releases, publications in trade magazines, scientific publications, generic presentations, social media posts; all tailored to interest groups.

#### Website

A new official project website was developed in the first months of the project.

The official project website<sup>6</sup> is the main dissemination interface presenting project activities and results to general public. The page will be regularly updated with news, events, success stories and project actions like open calls. All of the project dissemination materials will also be published on the website. Arctur, as the WP5 leader is responsible for the website management. As there will be no Fortissimo Marketplace anymore, the Fortissimo project website (where the main information on the

<sup>&</sup>lt;sup>6</sup> See FF4Euro HPC: <u>https://www.ff4eurohpc.eu/</u>

former FF and FF2 projects will be available) will be accessible on the <u>www.fortissimo-project.eu</u> domain and will be linked to the official FF4EuroHPC website.

The implementation of the website will be done in interaction with other WPs: with WP1 (general content), WP2 (open calls), WP3 (success stories).

The website will be maintained by the project partner Arctur and will also persist after the conclusion of the project.

**Key Performance Indicators:** Target values are presented in Table 3 and Table 4. During the project lifetime the number of webpage visits (#webpage visits) and length of the time spent (#time webpage) on the website will be measured with the aim to monitor the website viewership, popularity, and attractiveness.

**Time frame:** The development and design need to be done by M3, general content and the open call content also needs to be added by M3, additional content can be uploaded from M4 onwards.

#### **Brochure**

The brochure will be available via the project website. It will be created as a first contact point for the interested stakeholders. The brochure will be updated continually with the project's progress. The project brochure is one of the dissemination materials that can be adapted in terms of size and language (technical, business) to reach the respective interest groups from diverse industries and geographic regions.

**Time frame:** The first general version of the project brochure needs to be designed by M4. Furthermore, there will also be specific versions, which will be created to address specific target groups (two versions) by M4.

#### **Posters**

The project poster can be adapted over the course of the project in terms of size and language (technical, business) to reach the respective interest groups from diverse industries and geographic regions. The poster will be created to represent the project at different events such as trade fairs, workshops, user group and conferences.

**Time frame:** the poster will be developed upon request and will be tailored to specific needs. It is planned to create at least three versions of the poster during the lifetime of the project.

#### Social Media posts

Posts on the social media channels (<u>twitter</u><sup>7</sup> and <u>LinkedIn</u><sup>8</sup>) have the goal to increase awareness, traffic on the website and to boost brand engagement. The social media channels used within the project are: Twitter, LinkedIn and <u>You Tube</u><sup>9</sup>.

LinkedIn is one of the largest business social networks, which is build up through partnerships. The LinkedIn page will be used to reach the target audiences and build awareness of the FF4EuroHPC project through partnerships and in relevant groups.

A social media <u>calendar<sup>10</sup></u> for scheduling posts was prepared, and a KPI table was set to monitor this activity and to measure the goals which will increase awareness and boost brand engagement.

<sup>&</sup>lt;sup>7</sup> See <u>https://twitter.com/FF4EuroHPC</u>

<sup>&</sup>lt;sup>8</sup> See <u>https://www.linkedin.com/company/ff4eurohpc</u>

<sup>&</sup>lt;sup>9</sup>See <u>https://youtu.be/nM0dt4bhmgo</u>

<sup>&</sup>lt;sup>10</sup> See <u>https://docs.google.com/spreadsheets/d/1qsytMoqUnpzkALmP3isonWoCg0S1OVynyiMjT44El30/edit#gid=0</u>

The guidelines for the dissemination material are available in the appendix. This should provide a guide for all of the project partners to create suitable content.

Each partner needs to contribute one post for twitter and one for LinkedIn within a six weeks' frame (refer to the calendar).

#### KPIs:

**Twitter:** #followers - 300 total, #tweets – 500 total, #tweet impressions – 200 per month

**LinkedIn:** #posts – 100 in total #followers - 500 total, #unique visitors, #impressions – 200 per month

**YouTube:** #videos - 6 videos of success stories

#### <u>Newsletter</u>

During the project lifetime **five newsletters** will be released. The newsletter is an additional tool to help promoting the project activities and results. It will be linked to other social media channels and uploaded on the project website.

The layout will be aligned with the FF4Euro HPC visual identity, it will consist of at least three different sections. There will be the possibility to subscribe through the Mail Chimp subscription form implemented on the official webpage.

**KPIs with time frame:** To publish a newsletter at least every seven months, and to have up to 100 subscribers at the end of Y1, and 50 more subscribers at the end of Y2 of the project.

#### **Flyers**

For each success story a downloadable flyer will be developed. It will be published next to the story presentation on the website. If needed, updates of the flyers will be created.

**KPIs with time frame**: refer to Table 3.

#### **Publication in trade magazines / papers**

After the publication of the first edition of the Fortissimo Success Stories Booklet, partners will be asked to promote their success stories through publication in trade papers. This is an additional way to promote the project results in an efficient way.

**KPIs**: At least two publications in sector-specific magazines per Partner by M36 (ten publications in total).

#### Press Releases & Press clippings

Press clippings will be collected as a result of the awareness raising and the project results dissemination. Press releases and clippings are the main channel for addressing the general public. The table for Press clipping collection must be filled by partners and is available on the <u>BSCW</u> <u>portal<sup>11</sup></u> (ref. to the .xls file "**Metrics FF4EuroHPC**").

**KPIs with time frame:** Three press releases, ten articles by M36.

#### **Generic presentations**

<sup>&</sup>lt;sup>11</sup> BSCW is HLRS shared workspace server. HLRS is FF4EuroHPC project leader.

The project presentation can also be adapted in terms of size and language (technical, business) to reach the respective interest groups from diverse industries and geographical regions. The presentation will be created for representing the project and Open Calls at different events such as trade fairs, workshops, user group, conferences.

**KPIs with time frame**: the presentation will be developed upon request and will be tailored to specific needs. It is planned to have at least three versions of the presentation during the project life time.

Among all the above-mentioned dissemination content there are some of them that are planned to be adapted and tailored for the specific needs and/or target groups:

- Project brochure and flyer
- Project poster
- Project presentation (.ppt)

#### **Conferences, trade fairs and other events**

One of the important dissemination activities is attending events which are relevant for promoting the project and its results. The purpose of attending events is also to get in contact with the representatives of the target group. The event plan will be prepared on a yearly basis and it will be updated constantly. Each partner has to inform the WP5 leader about the events they are going to attend (actively or passively) and after that a short reporting about the attended event should be created. At least one photo from the event is expected. The news item about the active participation in the event should be prepared by partner(s), who visited the event. All data and information about the events will be collected in the .xls file "Metrics\_FF4EuroHPC" which is uploaded on BSCW portal.

**KPIs:** Attend a minimum of five relevant events.

Communication actions	Target Group	KPI & Target Values	Time Frame
Website	SMEs, General public, Press, Potential open call proposers	#visitors 7,000 #page views 1,500	Ву М36
Brochure	General public, Innovation centres, Ind. associations, SMEs.	#updates 3 #tailored versions 3	By M24
Poster	General public, Innovation centres, Ind. associations, SMEs.	#updates 3 #tailored versions 3	By M24
Social Media (Twitter, LinkedIn)	General public, Innovation centres, Ind. associations, SMEs.	#followers total 300 #tweets total 500 #tweet impressions 200	By M36 (50% by M12, 25% more by M24, total by M36)

Please refer to Table 3, in which the KPIs are summarised per communication action:

Newsletters	SMEs, ISVs, Ind.	#issues 5	Issues every 7M
	associations, HPC ecosystem	#subscribers 150	70% of subscribers by M12
Articles in sector magazines / papers	SMEs	#articles 10	5 by M30, 5 by M35
Press releases	Press	#press releases 3	1 per year
Press clippings	General public	#articles 10	By M36
Visits to trade fairs, user groups, conferences, workshops	SMEs, ISVs	#events 5	Participation to events by M35 70% visits during Y1 and Y2

 Table 3: KPIs for communication actions.

In order to track all the activities that have been performed, the .xls file "Metrics\_FF4EuroHPC" has been created where all partners will be regularly asked to insert information about the communication actions they have performed (events attended, press releases, press clippings).

#### 5.1.3 Production of three promotional videos for each call, six videos in total

For each tranche of application experiments (from the two open calls), **3 promotional videos** will be produced for the top experiments. These will be approximately 2-5-minute long videos that are also suitable for online or conference presentations. A typical scenario for all videos is: FF4EuroHPC project introduction, short presentation of partners and industrial sector of the experiment, experiment challenges and achievements, benefits of using HPC, HPDA and AI as well as the impact on end-user.

Prior to the actual video shoot, the detailed scenario has to be approved from project partners and from experiment partners. The video will be used for dissemination purposes during the project life time and beyond.

The *Video Consent and Release Form* will need to be signed by all involved parties prior to the video shooting.

**KPIs**: six videos produced; 2,000 views in total; **Time frame:** From M26 to M35.

#### 2.4 Task 5.2: Success Stories

#### GOAL Dissemination of "lessons learned" from the usage of advanced HPC services

Success stories are the main outputs of the FF4EuroHPC project and are expected to be delivered by each experiment. A clear presentation of the business benefits for the experiment partners in these stories will be the main focus. This can be used **to achieve broader impact by serving as a role model**. These stories highlight **what can be achieved** using advanced HPC services, and thus **address low awareness** which is a key inhibitor to the take-up of modelling, simulation and analytics solutions by companies that have not used such before.

For organisations in related industrial sectors, the success stories provide summarised information about the technical experiment results. This helps them to benefit by investigating similar approaches. More generally, the success stories explain the potential business benefits and innovation impact from using advanced HPC services, which can inform a broader range of stakeholders and motivate a wide range of potential HPC users.

15 to 20 success stories are expected to be produced for each open call tranche, up to 40 in total.

The time frame for generation and production of the first tranche of success stories is M25–M26 and for the second tranche of the success stories is M34–M35.

#### ACTIVITIES:

5.2.1 Writing success stories and collecting materials (images, relevant data and content) from the experiments

Each success story will be written following **pre-defined templates and scenarios**, prepared by WP5. These focus on the lessons learned and business benefits of the use of advanced technologies and services by end users and other members of the value chain and thereby quantify ROI, time to pay back investment and value of new market created. WP3 will support these activities by contributing contents of the experiments.

To produce success stories for dissemination purposes the following material will be collected:

- a) Content/text of success stories written in tailored/dedicated template
- b) Four images of the experiment in high resolution min 1200x800 px, .jpg or .png format (team image, technical image1, technical image2, image3).
- c) Data: role of experiment partners (end user, ISV, domain expert, HPC provider), country of end user, name of software used, name of industrial sector.

#### 5.2.2 Dissemination of the success stories (website, social media, flyers, newsletter, booklet)

All success stories will be disseminated through the following communication channels or means: Website, e-Flyers, Booklet, Newsletters, Social Media (Twitter, LinkedIn, You Tube)

**Target groups will be reached via direct and indirect communication channels.** In case of an indirect communication, intermediaries (Industry associations, Hubs) are used to reach the target group (SMEs). In case of a direct communication, there will be no intermediaries. It is a direct communication with the specific representative of the target group (see also Table 2: Actions for communication and dissemination of the project results).

All success stories will be published in a special section dedicated to this topic on the official project website<sup>12</sup>. For each success story a downloadable flyer (PDF) will be generated. There will also be a search option to filter stories by sector, and by country. Other options for searching can be added upon request (for example: by ISV or SW used). Stories will be included in different ways in the project newsletters and in the social media posts with the aim to raise awareness of what can be achieved using advanced technologies.

Two printed editions (booklets) of the success stories will be generated. Booklets have proven to be an effective means of dissemination for events like trade fairs involving face-to-face contact with potential users who are new to HPC, HPDA and AI with regard to how it can help their businesses.

<sup>&</sup>lt;sup>12</sup> See <u>https://www.ff4eurohpc.eu/</u>

The second edition of the booklet will be equipped with an ISBN code for distribution purposes to relevant and interested European libraries.

**KPIs:** please refer to Table 4.

Outputs with ref. to success stories	Target Group	KPIs & Target Values	Time Frame
Website	General public.	#views: 200	From M25 to M36
Downloadable PDF	SMEs, ISVs, general public.	#downloads: 30	From M25 to M36
Booklet (two editions)	SMEs, ISVs (trade fairs)	#500 printed and distributed	1 <sup>st</sup> ed. by M26 2 <sup>nd</sup> ed. by M35
Videos	SMEs, general public.	<ul><li>#videos: 6 produced</li><li>#views: 2,000 in total</li></ul>	From M25 to M36
Newsletter	SMEs, ISVs, Inn. centres, Ind. associations, HPC ecosystem.	To be included in last two issues.	From M25 to M36
Social Media (LinkedIn & Twitter) (YouTube for video)	Inn. centres, SMEs, Ind. associations.	<ul> <li>#posts 5 (past)</li> <li>#posts 15 (new)</li> <li>To disseminate past FF2</li> <li>success stories and actual</li> <li>FF4EuroHPC success stories.</li> </ul>	Up to M25 past stories (from previous Fortissimo2 project <sup>13</sup> ) From M25 to M36 new stories

 Table 4: KPIs for Success stories.

### 2.5 Task 5.3: Collaboration with EuroHPC and other entities

# GOAL: Execution and evaluation of the collaboration with different entities; especially within the EuroHPC

To achieve successful collaborations with different HPC actors, at first those must be catalogued in a comprehensible and clear way. A number of existing materials like the European HPC Handbook<sup>14</sup>, networks of the participating partners and non-confidential results from other projects will be exploited, in order to find actors in the European HPC System. Once the overview is given, the evaluation regarding benefit and extent of possible collaboration will take place. The outcome of this process will be a list of entities suitable for cooperation, which will then be divided into target groups

<sup>&</sup>lt;sup>13</sup> See <u>https://www.fortissimo-project.eu/</u>

<sup>&</sup>lt;sup>14</sup> See <u>https://www.etp4hpc.eu/european-hpc-handbook.html</u> for more information.

and addressed via the appropriate channels. Furthermore, connections to the EUROHPC JU<sup>15</sup> and the governing boards will be established and the representation of the EuroHPC management team at information events will be granted.

Some first steps in this process have already been made, for example an initial presentation to the National Competence Centres (NCCs) in HPC within the EuroCC project<sup>16</sup>, or a first contact to several Centres of Excellences in HPC (CoEs<sup>17</sup>) as well as other European initiatives. This task will have regular check-ups to align the measures with the tasks, goals, as well as a series of mechanisms within the working group.

#### **ACTIVITIES:**

#### 5.3.1 Identification and Evaluation of potential collaborations

This includes identification, analysis, ROI evaluation, and prioritisation of potential collaborations with entities from industry, European projects, research groups, and others, especially in the frame of EuroHPC.

#### 5.3.2 Creating the collaboration roadmap

On the basis of the results evaluation, a roadmap and a collaboration network, which will need to be maintained, will be generated. Tailored dissemination material will be produced to ensure win – win situations.

#### 5.3.3 Contribution to the EuroHPC JU initiative

This includes exchanging information with the EURO HPC JU on a project level, communicating with the INFRAG or the RIAG governing board and sharing the information about any informative events provided by the EuroHPC Management Team.

#### 5.3.4 Collaboration with national HPC Competence Centres

Collaboration with the NCCs will facilitate the engagement with relevant SMEs and industrial communities in their regions.

#### **KPIs:** please refer to **Table 5.**

KPIs	Target Values	Time Frame
Identification of relevant actors	#15	Until M8
Successful contact uptake	#10	Until M10
Successful collaborations	#5	Until M15

Table 5: KPIs for collaboration with other entities.

<sup>&</sup>lt;sup>15</sup> See <u>https://eurohpc-ju.europa.eu/</u> for more information.

<sup>&</sup>lt;sup>16</sup> See <u>https://www.eurocc-project.eu/</u> for more information.

<sup>&</sup>lt;sup>17</sup> See <u>https://www.hpccoe.eu/</u> for a description.

# **3** Conclusion

The dissemination activities are supporting one of the general objectives of FF4EuroHPC, which is to facilitate the widening of industrial HPC user communities and service providers in Europe by delivering compelling success stories for the use of HPC by SMEs; ensuring maximal awareness via communication and dissemination in collaboration with relevant DIHs and industry associations.

WP5 will coordinate the dissemination activities with the support and contribution from WP2, WP3, and WP4, addressing the project target groups covering different industries and a broad geographical scope in Europe.

KPIs are associated with the major activities and the progress will be frequently monitored to be able to potentially update the strategy for success. Based on this plan the key activities within the available resources will line up to contribute to the success of the FF4EuroHPC project.

# 5 Appendix

# 5.1 Draft Stakeholder Analysis

Stakeholder	Importance	Benefit for FF4EuroHPC	Benefit for stakeholder	Remarks				
Category: Hubs (funded by EU)								
nHPC CCs (national HPC competence centres)	High	Regional outreach	Supports their engagement with SMEs	To be established.				
CSA for nHPC CCs	High	Central point of contact for nHPC CCs	Supports their engagement with nHPC CCs	To be established.				
Relevant DIH	High	Regional outreach	Supports their work with SMEs	Relevant subset to be selected, ca. 100 with HPC expertise				
European HPC Eco	osystem players							
PRACE SHAPE	Medium	Outreach to their network	Some stakeholders might be interested in OC	SME programme				
EOSC	Medium	Same as above	Some stakeholders might be interested in OC	Has SME programme				
ETP4HPC	Medium	Same as above	Increased visibility to industrial end users	None				
BDVA	Medium	Same as above	Increased visibility to industrial end users	None				
Funding bodies								

Public Copyright © 2020 Members of the FF4EuroHPC Consortium

EuroHPC JU	High	Visibility and awareness raising	Support for the promotion of the European HPC strategy	None			
Category: Industry							
End user: SME with HPC experience	Medium	Raising awareness about FF4EuroHPC in the user communities	Keeping abreast of HPC application developments	Not primarily addressed by the call			
End user: SME with computing / simulation experience	High	Potential experiment participants + Raising broad awareness	Potential FF4EuroHPC participation, raised awareness of HPC potential	E.g. using a simulation code on in- house work- stations			
End user: SME without computing / simulation experience	High	As above	As above	None			
HPC capable ISV	High	Potential experiment participants + Raising awareness about FF4EuroHPC in the HPC ecosystem	Potential FF4EuroHPC participation, awareness of application domain developments	Vendor of HPC- capable software suitable for above SMEs, often part of experiment			
HPC / engineering consultants	High	As above	As above	Needed as Application / HPC experts in experiments			
HPC centres	High	As above	As above	None			
Commercial HPC infrastructure providers	Medium	As above	As above	None			
Industry associations	High	As above	Service to their Members: funding opportunities & success stories	E.g. NAFEMS			

Category: Academia							
Code owner	Medium	Potential experiment participants + Raising awareness about FF4EuroHPC in the HPC ecosystem	Potential FF4EuroHPC participation, awareness of application domain developments	Research institutes developing HPC codes suitable for SMEs			
Application experts	Medium	Potential experiment participants + Raising awareness about FF4EuroHPCin the HPC ecosystem	Potential FF4EuroHPC participation, awareness of application domain developments	Potential partners in experiments			
Category: General public							
Press	Medium	Main channel for addressing the General public	Reporting opportunities for leading-edge industrial innovation	None			
General public	Medium	Creating positive awareness to influence the continued political support for HPC R&D&I	Understanding the role of HPC in the Digitisation of European Industry and the societal impact arising from many applications	None			

#### 1. Social media

#### 1.1 twitter:

Maximum tweet length: 280 characters Ideal Length of a Tweet: 71-100 Characters If the post leads to referring page, add link (short link via bitly: https://bitly.com/) Use tags of organisations/SMEs/products, that have a twitter account (use @ - example @ETP4HPC) Use hashtags - #FF4EuroHPC, #HPC #AI #HPDA #SME etc. Add high quality pictures.

#### 1.2 LinkedIn:

Maximum post length: 3,000 characters Ideal Length of a post: 100 Characters If the post leads to referring page, add link (short link via bitly: https://bitly.com/) Use tags of organisations/SMEs/products that have LN account (use @ - example @ETP4HPC) Use hashtags - #FF4EuroHPC, #HPC #AI #HPDA #SME etc. Add high quality pictures.

#### 1.3 YouTube:

Video title: 70 characters Video length: max. of 3 mins (if this is a promo video, success story video) Photo material – Photos should be provided separately in as a .png

#### 2. News Item

News title: 70 characters Body text: up to 2,500 characters, black text, no formation Add at least one high quality photo (min. 1200x800 px, and max. 1800x1200 px) Video (optional) – video has to be uploaded first on YouTube, and then embedded on the page. Add links, if needed. **Formats:** 

Text content: .docx (Word) Photo material – Photos should be provided separately in .png format

#### **Project logo**

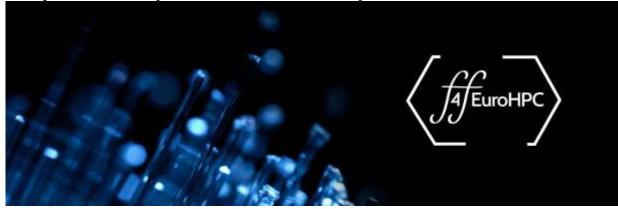

#### Visual identity banner

This banner is adjusted for all of the dissemination material and communication channels – including the website, the social media profiles and the cover photo, the Power Point background, flyers and the newsletter template.

Examples: Social media profile photo.

Example: Website title picture and Social media cover photo.

Example: PPT slide template
